TECHNICAL MANAGEMENT OF A YACHT HAS NEVER BEEN SO EASY WITH CINDY

We are pleased to announce that our Computerized Maintenance Management System (CMMS) CINDY, has just been approved by the BV (Bureau VERIT CINDY, our revolutionary technical management system, was developed LGM (our parent company) in collaboration with our superintendents specialized in Yachting. This allows us to customize CINDY according to needs.

Locating equipment on board has never been simple ; with interactive drawings, CINDY lets you quickly search and locate equipment visually. CINDY is all Windows/Android based ; the application is also available for smartphone and Android tablet. Please don't hesitate to contact us for any further information.

CINDY is a software solution for the technical management of yachts. It provides either the Fleet Manager or the Captain/Chief Engineer with a tool to manage the volumes of digital information that they are required to maintain all the yacht's equipment in matter of :

Yachts Equipment data base
Spare parts list
Planned Maintenance program
Purchase Orders
Event Based Maintenance
Engine room Log book
Works & reports and service histories
ISM Management
